Full Stack Web Developer with expertise in Laravel, React.js, and end-to-end web application development.

SUMMARY

Passionate Full Stack Web Developer building dynamic, responsive, user-centric web applications with modern technologies. Proficient in backend and frontend frameworks, experienced in Agile methodologies, and committed to delivering scalable, efficient solutions that meet objectives. Skilled in SEO optimization, cross-browser compatibility, excited to contribute to innovative projects, foster collaboration, and pursue learning.

EDUCATION

Bachelor of Science in Computer Science | Antonine University – Baabda, Lebanon September 2026

PROFESSIONAL EXPERIENCE

Backend Developer (Internship) | Xpertbot

October 2024 – April 2025

- Contributed to project success within an Agile methodology, engaging in daily stand-ups and sprint reviews to ensure continuous progress and team alignment on development goals.
- Engineered and implemented key backend features using the Laravel framework and MySQL, focusing on creating robust, scalable, and efficient server-side logic for web applications.
- Validated API endpoints meticulously using Postman, ensuring accurate request and response handling, and maintaining the integrity of data communication between frontend and backend systems.
- Utilized Git for version control, managing codebases through branching, merging, and pull requests to facilitate seamless team collaboration and maintain a clean project history.
- Participated actively in peer code reviews, providing and receiving constructive feedback to uphold coding standards, improve application performance, and foster a culture of excellence.

FREELANCE EXPERIENCE

Freelance Web Developer | Self-Employed

September 2023 – Present

- Deliver bespoke e-commerce and portfolio websites, translating client requirements into responsive web applications that meet business goals and enhance online presence.
- Integrate dynamic features such as comprehensive product management systems and responsive layouts to ensure an optimal user experience across all devices and screen sizes.
- Implement Search Engine Optimization meta tags and Open Graph protocols, significantly improving search engine visibility and enhancing social media sharing previews for increased user engagement.
- Manage complete project deployment, including hosting setup, domain configuration, SSL certificate implementation, and database provisioning to ensure secure and reliable live application performance.
- Provide dedicated post-launch support, performing regular updates, troubleshooting issues, and optimizing performance to guarantee sustained client satisfaction and application longevity.

PROJECTS

Tech-Shop E-commerce Website (Laravel, MySQL) ([Link](#))

June 2025 – July 2025

Developed a full-featured e-commerce backend using Laravel and MySQL, following the MVC architecture for clean code organization and maintainability. Used Laravel middleware to manage authentication, restrict access to admin routes, and enforce role-based permissions. Implemented password hashing, session handling, and dynamic shopping cart features. Built a secure, role-protected admin dashboard for managing products, categories, and site content, ensuring a stable and scalable online retail platform.

BitCast Blog Website (PHP, MySQL) ([Link](#))

June 2025

Developed a modern blog application featuring secure authentication with BCrypt hashing and post management. Integrated a real-time like system, threaded comments, and replies using PHP, MySQL, and AJAX. Ensured responsive design and thorough server-side validation for a seamless user experience.

Car Rental Website (PHP, MySQL) ([Link](#))

April 2025 – June 2025

Developed a PHP-based car rental web application featuring full authentication, separate admin and customer panels, real-time booking management, and detailed invoicing for seamless rental operations. Ensured secure user access and efficient transaction processing.

React E-commerce & Collaboration Apps (React.js, Firebase) ([Link](#))

April 2025

Built a fully responsive single-page application (SPA) for e-commerce and team collaboration using React.js and Firebase. Implemented user authentication, cart management, live chat, and shared notes with real-time updates. Leveraged React Hooks for efficient state management and applied comprehensive error handling to ensure a smooth and reliable user experience.

TRAINING AND CERTIFICATE

Full Stack Web Development Bootcamp | Youbee.ai

March 2025

- Completed an intensive program focused on web development using HTML, CSS, JavaScript, PHP, Laravel, Angular, and MySQL. Gained hands-on experience building dynamic, scalable applications.

Full Stack Web Development Course | Devrubic

March 2025

- Acquired front-end and back-end skills with technologies like React.js, Node.js, Firebase, and Git. Developed responsive applications and collaborative coding practices using GitHub and version control.

SKILLS

Technical Skills: HTML, CSS, SCSS (SASS), JavaScript, TypeScript, PHP, C++, Java, React.js, Angular, Laravel, Node.js, Firebase, MySQL, NoSQL, Git, GitHub, Bootstrap, Postman, DevTools, Ajax, Vercel, Hostinger, RESTful APIs, Object-Oriented Programming, Backend and Frontend Development, Full Stack Web Development.

Soft Skills: Problem-Solving, Team Collaboration, Communication, Time Management, Adaptability, Continuous Learning, Attention to Detail, Critical Thinking, Creativity, Self-Motivation.

LANGUAGES

Arabic (Native), English (Fluent).
