SUMMARY

I am a passionate Full Stack Web Developer with a strong focus on creating dynamic, responsive web applications using modern technologies, always looking forward to learning new skills and technologies.

EXPERIENCE:

- **Software Developer (Internship)**
  Xpertbot | October 2024 – April 2025 | Abidjan | Remote
  Contributed to the development of scalable web applications using Laravel, enhancing functionality and optimizing user experience.
- **Freelance Developer**
  2023 | Remote
  Developed various web applications and websites for clients, creating responsive and user-friendly solutions.

EDUCATION & CERTIFICATIONS:

- **Antonine University**
  bachelor's degree in computer science | 2023 – Present | Lebanon
- **Youbee.ai** | Full Stack Web Development Bootcamp | June 2024 – March 2025 | Remote
  Gaining advanced expertise in full-stack development, including HTML, CSS, JavaScript, PHP, Laravel, Angular, and MySQL.
- **Devrabic** | Full Stack Web Development Course | November 2024 – March 2025 | Remote
  Acquiring comprehensive skills in HTML, CSS, SCSS, JavaScript, React.js, Node.js, Firebase, Git, and GitHub.

PERSONAL PROJECTS: (All projects are deployed and linked in my portfolio)

- **BitCast Blog Website (PHP, MySQL)**
  Developed **BitCast**, a modern and secure blog web application featuring robust user authentication with BCRYPT password hashing, comprehensive post management, dynamic real-time like system, threaded comment and reply functionality, responsive design with Bootstrap, and thorough server-side validation, leveraging PHP (PDO), MySQL, JavaScript (AJAX/Fetch API), and jQuery.
- **Car Rental Website (PHP, MySQL)**
  Developed a PHP-based car rental web application with full authentication, admin and customer panels, real-time booking management, and detailed invoicing.
- **E-commerce Website (React.js, Firebase)**
  Built a fully responsive e-commerce platform using React hooks and essential libraries / dependencies for user authentication, cart management, and real-time data updates, with robust error and exception handling
- **Team Collaboration App (React.js, Firebase)**
  Built a real-time team collaboration app using React hooks and essential libraries / dependencies with user login, live chat, and shared note functionality, displaying usernames and timestamps for each interaction
- **Hospital Management Information System (JavaFX)**
  Designed and implemented a desktop application to efficiently manage patient records, appointments, and staff data.
- **Weather Application (React.js)**
  Created an intuitive user interface to retrieve and display real-time weather data utilizing public APIs.
- **Task Manager (JavaScript)**
  Built a task management tool with filtering, drag & drop, priority features and persistent local storage for enhanced user productivity.
- **Strong Password Generator (JavaScript)**
  Developed a customizable password generator with adjustable strength settings and clipboard functionality.
- **Quiz Application (JavaScript)**
  Programmed an interactive quiz application incorporating score tracking and immediate color feedback mechanisms with timer.
- **Additional Projects**
  Delivered various web applications including portfolio sites, an interactive rock-paper-scissors game, and a functional calculator.
